

Reminders for Mrs. Hayes' class..... In the next two weeks your child will complete three different types of testing. All children ages PK-2nd grade take the PALS test two times a year. I will meet with your child one-on-one to complete this test. The STAR test is computerized. We will take that test in a group setting in the computer lab. The last assessment involves having your child read to me. This will allow me to document their reading level, comprehension, and types of errors they make while reading. Have a great two weeks!
